Rewrite the Abstract as it appears on the following page.

ABSTRACT OF THE DISCLOSURE

A wire-collecting device of a computer accessory includes a casing and a fastening device. The casing is coupled to the computer accessory and has a first opening. A collecting portion is provided inside the casing for containing a signal-transmission device of the computer accessory. The fastening device is positioned on a first interior surface of the casing, and the fastening device is positioned near the first opening to clasp the signal-transmission device.
